

Home Soda Water Carbonator

This compact appliance quickly carbonates water for home use. It features a bottle receptacle and lever-operated carbonation mechanism.

Product Overview

Compact Home Carbonation Solution

The HB-1307 soda maker brings the convenience of fresh, sparkling water directly to your kitchen. Designed with a sleek and modern aesthetic, this appliance features a high-performance, lever-operated carbonation system that is both quick and efficient. It is an ideal sustainable alternative to purchasing pre-made bottled carbonated beverages, offering professional-grade utility in a compact home-friendly footprint.
