

Home Soda Water Maker

This soda maker allows users to easily carbonate water at home. It features a PET bottle with a capacity for 530-640ml of water and utilizes a CO2 cylinder to infuse the water.

Product Overview

Refreshment On Demand

This home soda water maker transforms plain water into fresh, sparkling beverages in seconds without the need for electricity. Its eco-friendly design utilizes a reusable CO2 cylinder, making it a sustainable choice for your kitchen, home office, or restaurant. You can easily customize your drinks with syrups or fresh fruit to create healthy, delicious sodas, lemonades, and cocktails.

Key Features

Sustainability & Eco-Credentials
