

# Home Soda Water Maker

This soda maker allows users to easily carbonate water at home. It features a PET bottle with a capacity of 800ml and a CO2 cylinder.

## Product Overview

### Professional Home Carbonation

This home soda water maker provides an efficient and sustainable way to transform plain water into fresh sparkling soda in seconds. Designed for both domestic kitchens and professional environments like restaurants, it operates without electricity or batteries. By utilizing recyclable CO2 cylinders, it offers an eco-friendly solution for crafting custom beverages, including lemonades and cocktails.

## Technical Specifications

Certifications & Safety	LFGB Compliant
Power Requirements	Manual (No electricity or batteries required)

## Features

### Health and Convenience

- Promotes digestive health
- Rapid carbonation process
- Eco-friendly refillable cylinder system
- Compatible with fresh fruits and syrups for custom flavors

## Applications

### Best For

Home • Restaurants • Parties • Kitchens
