

Home Theater Center Channel Speaker

This center channel speaker is engineered for home theater systems. It features a dual-woofer design with a central tweeter to deliver clear and balanced audio.

Product Overview

High-Fidelity Center Channel Audio

The C-203 is a specialized center channel speaker engineered to serve as the anchor of a high-performance home theater system. Featuring a robust 3-unit design, it delivers clear, balanced dialogue and sound reproduction essential for immersive movie, music, and gaming experiences. Its acoustic enclosure is optimized to minimize resonance, ensuring accurate sound dispersion and seamless integration with your existing surround sound setup.
