Overview

Residential Water Pressure Solutions

This home water pressure booster pump is designed to efficiently increase water pressure for various residential applications, including showers, faucets, and household appliances. Featuring durable construction with brass fittings, it offers a compact solution for homes experiencing low water flow. The unit is built for reliable performance and easy integration into existing plumbing systems.

Electrical Specifications

Power Configurations

Voltage	Frequency	Revolution
110-127V	60Hz	3300
220-240V	50Hz	2900

Degree of Protection

IP54

Insulation Class

B

Performance & Features

Maximum Head

10 m

Inlet/Outlet Size

3/4 inch

Suitable Applications

Shower, Faucet, Household Appliances
