

Hook Anchor Bolt for Concrete

Heavy-duty hook anchor bolts are designed for secure fastening in concrete and brick. Constructed from high-strength steel, they feature an expanding sleeve and a threaded hook for suspending fixtures and equipment.

Product Overview

Heavy-Duty Hook Anchor Bolt

This high-strength hook anchor bolt is engineered for secure and reliable fastening in concrete, brick, and other solid construction materials. Featuring an advanced expanding sleeve mechanism, it provides maximum holding power for demanding industrial and commercial applications. The threaded hook design offers versatile attachment options, making it an ideal solution for suspending heavy fixtures, equipment, and structural components.

Technical Specifications

Finish

Corrosion-resistant

Key Features

- Threaded hook for versatile attachment
- High-strength steel construction
- Corrosion-resistant finish
- Expanding sleeve for maximum holding power

Material

High-strength steel

Compatible Materials

Concrete, Brick, Solid Masonry

Mechanism

Expanding sleeve
