

Horizontal and Vertical Line Laser Level

This laser level projects both horizontal and vertical lines. It is designed for precise leveling and alignment in construction, installation, and various DIY projects.

Product Overview

Precision Laser Leveling Tool

This 1V1H self-leveling laser level is designed for high-precision alignment and leveling tasks in professional construction and installation environments. It projects both a vertical and a horizontal line, allowing for accurate layout work across a 10-meter working range. Built for reliability, this compact tool offers a robust solution for ensuring perfect alignment on the job site.

Technical Specifications

Performance Metrics

10 m Working Range	1 mm/5m Accuracy	8 hrs Working Time
------------------------------	----------------------------	------------------------------

Laser Specifications	635 nm, Class II
Self-Leveling Range	4 °
Tripod Mount	1/4"

Power & Environment

Power Supply	2 x AA Batteries
Operating Temperature	-10°C to 50°C

Features

Key Features	Self-leveling, 1V1H Cross Line, Compact Design
