

# Horizontal Bead Mill for Wet Grinding

This horizontal bead mill is designed for the efficient wet grinding and dispersion of various materials. It features a stainless steel grinding chamber and a user-friendly control panel.

## Product Overview

### High-Efficiency Wet Grinding Solution

This horizontal bead mill is engineered for the precise wet grinding and dispersion of diverse industrial materials. Featuring a robust stainless steel grinding chamber and high-performance motor, it ensures consistent results for demanding applications. Designed for safety and reliability, this unit integrates essential monitoring instruments to support optimal operation in the paint, ink, coating, and chemical sectors.

## Technical Specifications

### Performance Metrics

<b>3 KW</b> Motor Power	<b>1440 r/min</b> Rotation Speed
----------------------------	-------------------------------------

### Electrical Requirements

Parameter	Value
Voltage	380V
Frequency	50HZ

### Design & Construction

- Stainless steel grinding chamber
- IP55 protection rating
- Integrated pressure gauges
- Safety protection devices
- User-friendly control panel

## Application

Suitable Industries	Paint, Ink, Coating, Chemical
---------------------	-------------------------------

## Identification

Model Number	WMLD-100B
--------------	-----------
