

Horizontal Centrifugal Water Pump

This horizontal centrifugal pump is designed for efficient water transfer in various applications. It features a stainless steel pump body and durable motor housing, ensuring quiet operation and long service life.

Product Overview

High-Efficiency Horizontal Centrifugal Pump

This horizontal centrifugal pump is engineered for superior water transfer performance, incorporating advanced technology for reliable operation. Constructed with a durable stainless steel 304 pump body, it is specifically designed to handle light-corrosion mediums effectively. Known for its high efficiency and energy-saving capabilities, this unit is an ideal solution for diverse industrial and commercial fluid management requirements.

Technical Specifications

Corrosion Resistance

Light-corrosion medium compatible

Pump Type

Horizontal Centrifugal (Non-self priming)

Material

Stainless Steel 304

Applications

Key Applications

- Air conditioner systems
- Industrial cleansing
- Cooling systems
- Water supply
- Pressure boosting
- Irrigation
