

# Horizontal Cyclone Canister Vacuum Cleaner

This horizontal cyclone canister vacuum cleaner is designed with a cylindrical shape and large wheels for maneuverability. The cyclone technology ensures efficient dirt separation and filtration.

## Overview

### High-Efficiency Cleaning Performance

This horizontal cyclone canister vacuum cleaner is engineered for efficient dirt separation and superior filtration. Featuring a sleek white and black design, it combines maneuverability with a robust cylindrical build. The large wheels and integrated handle make it easy to transport, while the transparent dust container allows users to monitor fill levels at a glance.

## Technical Specifications

### Rated Power

**2000 W**  
Power

## Design & Build

### Mobility Features

- Large wheels for maneuverability
- Integrated carrying handle

### Color Scheme

White, Black

## Performance

### Filtration Technology

Cyclone technology for efficient dirt separation
