Product Overview

High-Efficiency Horizontal Drilling

This horizontal drilling machine is engineered for precision and efficiency in demanding industrial environments. Featuring a unique dual-worktable configuration, it significantly enhances productivity by allowing for simultaneous setup and drilling operations. Built with robust construction and advanced control systems, it is a reliable solution for various material drilling requirements.

Operational Features

Key Benefits

- Enhanced productivity via dual-table design
- Advanced control systems
- Robust industrial construction
- Integrated safety mechanisms

Worktable Configuration

Dual worktables for simultaneous setup and drilling

Protective Equipment

Cover Material

High-strength steel with corrosion-resistant finish

Cover Features

Central lifting ring, Domed shape, Corrosion-resistant, Impact protection
