Overview

High-Efficiency Horizontal Flow Wrapper

This automatic horizontal packaging machine is engineered for high-speed, consistent forming, filling, and sealing of various consumer goods. Featuring a robust stainless steel construction, it ensures durability and hygiene standards suitable for food and pharmaceutical industries. Its modular design and advanced control interface allow for precise adjustments and seamless integration into existing production lines.

Technical Specifications

Safety Features

- Emergency stop buttons
- Protective safety guards

Construction Material

Stainless Steel

Compatible Materials

Laminated Films, Polyethylene, Polypropylene

Performance & Application

Suitable Industries

Food & Beverage • Pharmaceuticals • Consumer Goods • Food Service

Typical Products

- Snacks
- Biscuits
- Noodles
- Disposable Cutlery
