Overview

Automated Cup Packaging Solution

This horizontal flow wrapper is engineered specifically for the automated counting and packaging of disposable plastic cups. Utilizing an advanced PLC control system and dual servo motors, it ensures precise stacking and sealing for quantities ranging from 1 to 100 units. Designed for high-volume environments, the machine combines robust construction with intuitive operation to improve production efficiency.

Performance

Counting Range

1 pcs

Min Count

100 pcs

Max Count

Control System

PLC Program Control, Dual Servo Motor, Double Frequency Inverter, PID Temperature Control

Technical Features

Capabilities

- Automatic stacking and counting
- Bag and film sealing
- Film cutting
- Adjustable production speed
- Random bag length cutting

Build Quality

Stainless Steel Frame • International Brand Components • Pneumatic Elements Included
