

Horizontal Flow Wrapping Machine

This horizontal flow wrapping machine is designed for packaging individual or grouped products. It features adjustable speed, film width, and product dimensions to suit various packaging needs.

Overview

Horizontal Flow Wrapping Machine

This horizontal flow wrapping machine is engineered for efficient, versatile packaging across food, pharmaceutical, and general manufacturing industries. Designed for both individual and grouped product wrapping, it features a robust stainless steel construction that ensures hygiene and long-term durability. The system integrates an adjustable infeed conveyor, film reel holder, forming box, and sealing jaws to provide a reliable packaging solution for various product dimensions.

Technical Specifications

Packaging Capabilities

- Individual product wrapping
- Grouped product wrapping
- Adjustable infeed conveyor
- Adjustable film width
- Adjustable speed

Suitable Industries

Food Industry • Pharmaceutical • General Manufacturing

Key Components

Component	Function
Infeed Conveyor	Adjustable product feeding
Film Reel Holder	Packaging material supply
Forming Box	Shape creation
Sealing Jaws	Package closure

Construction Material

Stainless Steel, Durable Industrial Materials
