

# Horizontal Lifting Clamp

This horizontal lifting clamp is designed for use with cranes in agricultural construction. It features heavy-duty chains and hooks to ensure secure lifting and horizontal positioning.

## Product Overview

### JPD Series Horizontal Lifter

The JPD Series Horizontal Lifter is a specialized tool engineered for agricultural construction machinery, particularly cranes. It is designed to facilitate the secure lifting and precise horizontal positioning of materials. Built with heavy-duty components, this lifter ensures reliability and safety in demanding agricultural construction and maintenance environments.

## Technical Specifications

### Key Features

- Heavy-duty chain assembly
- Reinforced lifting hooks
- Designed for horizontal positioning

Primary Application	Agricultural Construction, Crane Operations, Maintenance
Lifting Orientation	Horizontal
