

# Horizontal Material Mixer

This horizontal mixer ensures efficient and homogeneous blending of various materials. It features a robust mixing chamber, integrated feeding mechanisms, precise temperature control, and automated discharge capabilities.

## Product Overview

### Professional Horizontal Material Mixer

This horizontal material mixer is designed for high-performance mixing, drying, and coloring applications. It serves as an essential solution for the production of shaped plastic materials and pipes. The unit features advanced dual-heating functionality and high-precision electronic controls to ensure consistent quality and operational reliability.

## Technical Features

### Sealing Systems

- Patented mainshaft sealed apparatus
- Double-layer pot cover sealing

### Control Technology

- Programmable Logic Control (PLC)
- Air-opening device for heating mix cover
- Hydraulic pressure control for cooling mix cover

### Heating Functions

Electric Heating, Steam Heating

## Performance & Safety

### Additional Features

- Pulse dust-cleaning recovery device
- Dynamic balance tested blades
