

Horizontal Metal Band Saw

This horizontal band saw is designed for cutting metal. It features a robust frame, hydraulic clamping system, variable speed control, and coolant system.

Overview

High-Performance Horizontal Band Saw

This horizontal metal band saw is engineered for precision and efficiency in industrial metal processing applications. Designed to handle a wide range of metal profiles and solids, it features a robust frame construction ensuring stability during heavy-duty cutting operations. Equipped with a hydraulic clamping system, variable speed control, and an integrated coolant system, this machine delivers consistent, accurate results for professional manufacturing environments.

Technical Specifications

Model Number	GB4240X60
Cutting Capabilities	Metal Profiles, Solid Metal

Key Features

Integrated Systems

- Hydraulic Clamping System
- Variable Speed Control
- Coolant System

Performance Highlights

1 Heavy-Duty

Robust Frame Construction

1 Accuracy

Precise Cutting Mechanism
