

Horizontal Metal Band Saw

This horizontal metal band saw is engineered for cutting a variety of metal materials. It features a robust frame, a precision cutting mechanism, a coolant system, and a control panel for efficient and accurate operation.

Overview

Industrial Horizontal Band Saw

This horizontal metal band saw is engineered for precise and efficient cutting of various metal materials in industrial environments. It features a robust, heavy-duty frame designed to minimize vibration and ensure cutting accuracy during operation. Equipped with an integrated coolant system and an intuitive control panel, this machine provides a reliable solution for professional metalworking applications.

Technical Specifications

Model Number	GB4240
Cutting Method	Horizontal

Key Features

Performance Highlights

400 mm Max Cutting Capacity	
Capabilities	Precision Cutting, Industrial Grade, Coolant System Integrated, Robust Frame Construction
