

Horizontal Metal Band Saw

This horizontal band saw machine is designed for cutting metal materials. It features a robust frame, hydraulic clamping system, and variable speed control for precise and efficient cutting operations.

Overview

Precision Metal Cutting Performance

This horizontal band saw is engineered specifically for demanding metalworking environments, featuring a robust frame construction for stability during heavy-duty operations. It incorporates a precise hydraulic clamping system to ensure material security and accuracy throughout the cutting process. With integrated variable speed control, operators can easily adjust cutting parameters to suit various metal types and thicknesses, maximizing efficiency and blade longevity.

Key Features

Machine Capabilities

- Horizontal cutting orientation
- Hydraulic clamping system
- Variable speed control
- Robust frame construction

Suitable Applications

Metalworking, Industrial Cutting, Precision Machining

Technical Details

Model Identifier

GB4260
