

Horizontal Metal Cutting Band Saw

This horizontal band saw is designed for cutting metal with precision. It features a robust frame and an integrated control panel for ease of use.

Product Overview

Professional Metal Cutting Solution

This horizontal metal cutting band saw is engineered for precision and reliability in demanding manufacturing and fabrication environments. Featuring a robust frame construction, it ensures stability during high-volume cutting operations. The integrated control panel allows for intuitive operation, making it a versatile addition to any industrial metalworking workshop.

Technical Specifications

Cutting Orientation

Horizontal

Model Number

GB4260

Key Features

Key Features

- Robust frame construction
- Precision cutting capability
- Integrated control panel
- Suitable for industrial fabrication
