

Horizontal Metal Cutting Band Saw

This horizontal metal cutting band saw is designed for cutting metal materials, including steel and aluminum alloys. It features a robust frame, adjustable cutting speed, and a coolant system.

Overview

Industrial Horizontal Band Saw

This horizontal metal cutting band saw is engineered for precise and efficient cutting of various metal materials, including steel, aluminum, and other alloys. Built with a robust frame for stability, it features an adjustable cutting speed and an integrated coolant system to ensure high-quality cuts. Designed for industrial applications, the machine is equipped with a blade tensioning device and an intuitive control panel for reliable, easy operation.

Technical Specifications

Machine Type	Horizontal Metal Cutting Band Saw
Compatible Materials	Steel, Aluminum, Alloys

Key Features

Machine Features

- Robust frame construction
- Adjustable cutting speed
- Integrated coolant system
- Blade tensioning device
- Easy-to-use control panel

Application Suitability

Industrial Use • Metal Fabrication
