

Horizontal Metal Cutting Band Saw

This horizontal metal cutting band saw is equipped with a coolant system and adjustable blade guides. It also features miter cutting capability for angled cuts up to 45 degrees.

Product Overview

Professional Horizontal Metal Cutting Band Saw

The BS-712GDR is a robust horizontal metal cutting band saw designed for precision and efficiency in industrial environments. It features a hydraulic downfeed control and an integrated coolant system to optimize cutting performance and extend blade life. With its miter cutting capability and quick-release vise, this machine offers the versatility needed for high-quality metal fabrication.

Core Performance

Cutting Performance

45 °

Max Miter Angle

Technical Features

Feed Control	Hydraulic downfeed control for precise cutting pressure
Cooling Method	Integrated liquid coolant system
Vise Type	Quick-release vise for efficient material handling

Construction & Design

Frame Construction	Robust steel frame
Blade Support	Adjustable blade guides

Compliance & Standards

Key Features	Miter Cutting, Horizontal Band Saw, Coolant System, Hydraulic Control
