

Horizontal Metal Cutting Band Saw

This horizontal band saw is designed for cutting metal workpieces with precision. It features a robust frame and a material feeding system for efficient processing of various metal profiles and solids.

Product Overview

Precision Horizontal Metal Cutting

The GB42100 is a professional-grade horizontal band saw machine engineered for the precise cutting of metal workpieces. Featuring a robust frame construction and an efficient material feeding system, it ensures stability and accuracy during operation. This versatile machine is ideal for processing a wide variety of metal profiles and solids, making it a reliable choice for industrial metalworking applications.

Technical Specifications

Model Number	GB42100
Machine Type	Horizontal Band Saw

Key Features

Design Highlights

- Robust frame construction
- Horizontal cutting blade orientation
- Integrated material feeding system
- High-precision cutting capability

Applications

Compatible Materials	Metal Profiles, Solid Metal, Industrial Components
----------------------	--
