

Horizontal Metal Cutting Band Saw

This horizontal metal cutting band saw is designed for precision cutting of various metal materials. It features a robust frame, adjustable cutting speed, and a coolant system for efficient operation and extended blade life.

Overview

Precision Metal Cutting Performance

This horizontal metal cutting band saw is engineered for high-precision cutting across a wide range of metal materials. Featuring a robust frame construction, it ensures stability during operation, while the integrated coolant system enhances cutting efficiency and significantly extends blade life. Designed for reliability and ease of use, it includes a secure workpiece clamping vise and an intuitive control panel for streamlined operation.

Key Features

Core Functionalities

- Robust frame construction
- Adjustable cutting speed
- Integrated coolant system
- Secure workpiece clamping vise
- Intuitive control panel

Model Identification

GB4032A
