

Horizontal Metal Cutting Bandsaw

This horizontal bandsaw is engineered for cutting metal with precision. It features a vise to secure the workpiece and a blade guidance system.

Overview

Versatile Horizontal Metal Cutting Solution

The BS-170G is a robust horizontal bandsaw engineered for precision metal cutting across various profiles and solid materials. It features a durable construction with a specialized blade guidance system to ensure accurate and clean cuts for professional applications. The integrated vise and accessible control panel provide a safe and efficient workflow for industrial metalworking tasks.

Key Features

Core Capabilities

170 mm

Cutting Capacity

Design & Construction

Build Quality

- Robust grey base construction
- Reinforced blue cutting arm
- Integrated workpiece vise
- Advanced blade guidance system

Operation & Control

Control System

Side-mounted control panel with accessible power switch

Supported Materials

Metal Profiles, Solid Metals, Industrial Alloys

Compliance

Standards & Compliance

CE
