Overview

Professional Horizontal Paddle Mixer

The Horizontal Paddle Mixer is a high-performance industrial mixing solution designed for the pharmaceutical, chemical, and foodstuff industries. Featuring a robust stainless steel horizontal tank, this machine utilizes an S-type agitating paddle to ensure consistent, homogeneous mixing of powders and pastes. With automated electrical controls for mixing time and discharge, it is engineered to enhance batch quality and operational efficiency.

Technical Specifications

Construction Material	Stainless Steel
Mixing Mechanism	S-type agitating paddle
Industry Applications	Pharmaceutical, Chemical, Foodstuff

Operational Features

Automation Capabilities

- Programmable mixing time
- Automatic stop function
- Electric discharge upon expiration

Safety Features

Operator Safety System • Automated Control
