

Horizontal Slurry Pump for Abrasive Materials

This horizontal slurry pump is designed for handling abrasive and high-density slurries. It features robust construction with replaceable wear parts for long service life and minimal downtime.

Overview

Heavy-Duty Slurry Pumping Solution

This horizontal slurry pump is expertly engineered to handle abrasive and high-density materials with exceptional reliability. Featuring robust construction and replaceable wear parts, it is designed to minimize downtime and extend service life in demanding industrial environments. It is an ideal choice for critical applications in mining, mineral processing, and industrial waste management.

Performance Metrics

Capacity Range

5 m³/h

Min Capacity

8000 m³/h

Max Capacity

Head Range

9 m

Min Head

134 m

Max Head

Technical Specifications

Power Range	0.55 - 1400 kW
Frequency	50Hz, 60Hz

Materials

Construction Materials

Cast Iron • High Chrome Cast Iron
