

Horizontal Triplex Pump for Industrial Applications

This horizontal triplex pump is designed for demanding industrial applications. It features a brass pump head, low-pressure detergent injection, and thermal and safety valves.

Overview

Professional-Grade Triplex Pump

This horizontal shift industrial triplex pump is engineered for demanding high-pressure applications, including industrial cleaning and fluid transfer. Featuring a robust brass pump head and a precision crank mechanism, it is designed for compatibility with horizontal shaft engines. With advanced safety features like thermal relief and safety valves, this pump delivers consistent, reliable performance in rigorous work environments.

Technical Specifications

Pump Type	Crank (For Horizontal Shaft Engine)
Pump Head Material	Brass

Performance Metrics

Model Performance Data

Model	Max Pressure	Rated Pressure	Rated Flow	Engine Req.
GA-34A	200 bar (2900 psi)	150 bar (2200 psi)	8 L/min (2.1 GPM)	5.5 HP
GA-34B	220 bar (3200 psi)	175 bar (2500 psi)	9 L/min (2.4 GPM)	6.5 HP

Features

Safety and Operation Features

- Low-pressure detergent injection
- Thermal relief valve
- Safety valve
