

Horizontal Universal Lathe Machine

This horizontal universal lathe machine is designed for turning internal and external surfaces, tapers, and end faces on rotary parts. It can also perform drilling, boring, and groove broaching on flat and irregular stock.

Overview

Horizontal Universal Lathe Machine

This horizontal universal lathe machine is engineered for versatility and precision in a wide range of turning operations. Built with a robust, high-quality cast iron bed, it ensures exceptional stability and durability for demanding machining tasks. Equipped with essential safety features and a comprehensive accessory package, this machine is an ideal solution for workshops and industrial settings requiring reliable performance for both small-batch and individual part production.

Equipment & Accessories

Standard Accessories

- 3-jaw chuck
- 4-jaw chuck
- Face plate
- Steady rest
- Follow rest
- Drive plate
- Dead centers
- Splash guard
- Oil tray
- Longitudinal mechanical stop
- Work lamp
- Coolant system
- Foot Brake
- Chuck guard
- Tool post guard

Optional Accessories

Tapper turning attachment, Quick change tool post, Live center, Digital readout, Thread chasing dial

Safety & Control

Safety Features

Foot Brake • Chuck guard • Tool post guard • Splash guard • Emergency stop
