

Hose Clamp Fastener

Hose clamps are used to secure hoses and tubes in place. They come in various sizes and styles, including band clamps, U-bolt clamps, and worm-drive clamps.

Product Overview

Industrial Hose Clamp Solutions

This comprehensive assortment of hose clamp fasteners is engineered for secure and reliable connection of hoses and tubes in demanding machinery and industrial environments. The collection features versatile designs including band clamps, U-bolt clamps, and worm-drive mechanisms to accommodate various pressure requirements and installation constraints. Built for durability, these fasteners provide consistent clamping force to prevent leaks and ensure operational safety.

Technical Specifications

Primary Applications

- Machinery Assembly
- Industrial Tube Securing
- Hose Management Systems
- General Fastening

Included Components

Hose Clamps • Screws • Fasteners

Types Included

Band Clamps, U-Bolt Clamps, Worm-Drive Clamps
