Product Overview

Industrial Hose Safety Solution

The Hose to Hose Whip Check Safety Cable is a high-strength security device engineered to prevent dangerous hose whip in the event of coupling failures. These cables ensure that hoses remain tethered during accidental separation, significantly reducing the risk of injury and equipment damage. Designed for versatility, they are suitable for use across industrial, construction, and agricultural environments.

Technical Specifications

Available Sizes

Cable Diameter	Length
1/8"	20.25"
1/8"	24"
1/2"	12"
3/16"	28"
1/4"	36"
1/4"	38"
3/8"	44"

Material	Steel SS 304
Configuration Types	Hose to Hose, Hose to Tool
