

Hospital Bed Elevator for Patient Transport

This hospital bed elevator is designed for transporting patients and medical equipment in healthcare facilities. It features a spacious cabin to accommodate beds, stretchers, and medical personnel.

Product Overview

Hospital-Grade Patient Transport

The WIN 2600 Series is a specialized elevator system engineered specifically for hospitals and sanatorium environments. It utilizes advanced gearless traction technology and integrated control systems to ensure smooth, quiet, and reliable operation. With a focus on patient comfort and clinical efficiency, the spacious cabin is designed to accommodate medical beds, stretchers, and support personnel with ease.

Technical Specifications

Drive System	SPM Gearless Traction Machine
Control System	VVVF Integrated Control

Features & Benefits

Safety Equipment

- Precise leveling technology
- Emergency stop functionality
- Integrated alarm system
- User-friendly control panel

Operational Highlights	Energy Saving, Environmentally Friendly, Quiet Operation, Stable Running, Hygienic Interior
