Product Overview

Industrial Efficiency

The RXH series hot air circulating drier is a versatile and efficient solution designed for uniform material drying across various sectors including pharmaceutical, chemical, and food industries. It features a robust stainless steel construction that ensures both durability and strict hygiene standards. Equipped with precise digital controls and a forced air circulation system, this unit provides consistent heat distribution to maximize product quality while minimizing processing time.

Key Applications

Suitable Materials

- Raw medicines and doses
- Traditional Chinese medicine tablets
- Powder and granulate
- Pigments and dyestuffs
- Dried vegetables and food
- Plastic resin

Industries Served

Pharmaceutical, Chemical, Foodstuff, Light Industry, Heavy Industry

Technical Features

Safety Standards

Over-temperature protection • Emergency stop functionality

Build Material

Stainless Steel
