

# Hot and Cold Brew Coffee Maker

This coffee maker offers both hot and cold brewing capabilities in one device. It features a 0.6L water tank, touch control panel, and a removable filter.

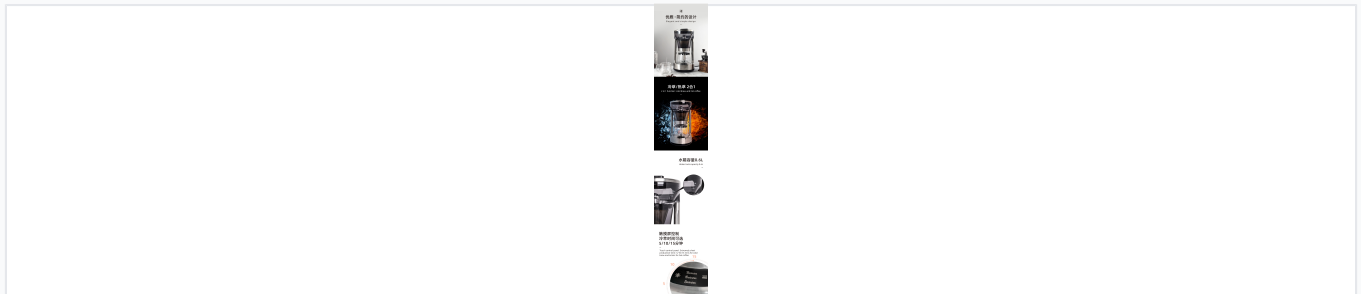

## Product Overview

### Versatile 2-in-1 Brewing Solution

This innovative coffee maker offers a seamless 2-in-1 brewing experience, allowing users to switch between cold brew and hot coffee with ease. Designed with efficiency in mind, it features a 0.6L capacity and an intuitive touch control panel. With extremely short production times—ranging from 5 to 15 minutes for cold brew and 6 minutes for hot coffee—it is an ideal solution for fast-paced professional or home environments.
