

# Hot and Cold Color Trace Label Cutting Machine

This ultra-high-speed cutting machine is designed for precise cutting of labels with hot and cold cutting capabilities. It features color trace position technology for accurate alignment.

## Product Overview

### Professional Label Cutting Efficiency

This ultra-high-speed label cutting machine provides both hot and cold cutting capabilities for diverse materials including woven labels, PVC trademarks, and wash care labels. Equipped with a high-precision color trace sensor and an advanced control system, it ensures exceptional accuracy even at high speeds. The machine features intelligent waste discharge, static elimination, and multiple operating modes to streamline high-volume production requirements.

## Technical Performance

### Cutting Speed

**580 pcs/min**

Cuts Per Minute

Cutting Accuracy 0.3 mm

Maximum Cut Length 2.5 m

## Features

### Operating Modes

- Debugging mode
- Positioning mode
- Fixed length mode
- Waste discharge mode

Core Functionalities Hot/Cold Cutting, Color Trace Positioning, Static Elimination, Waste Discharge, Adjustable Speed

## Certifications & Support

### Certifications

CE Certified • SGS Compliant

Warranty 1 Year
