

Hot and Cold Compressor Water Dispenser

This compressor water dispenser provides both hot and cold water. It features stainless steel tanks and uses R134a refrigerant for cooling.

Overview

Efficient Compressor Cooling Dispenser

This Hot and Cold Compressor Water Dispenser (Model RL-88LB) is engineered for reliable performance in both home and office environments. Featuring a robust compressor cooling system, it delivers consistent temperatures for both hot and cold water needs. The unit is built with durable stainless steel tanks for both heating and cooling, ensuring long-term hygiene and efficiency.

Performance Metrics

Hot Water Capacity

5 L/h

Heating Capacity

95 °C

Max Temp

Cold Water Capacity

2 L/h

Cooling Capacity

5 °C

Min Temp

Technical Specifications

Electrical Requirements

Parameter	Value
Voltage	220-240V (110-127V available)
Frequency	50-60Hz
Heating Power	550W
Cooling Power	90W

Tank Construction

Stainless Steel Heating Tank • Stainless Steel Cooling Tank

Internal Tank Volumes

- 1.0 Liters Heating Tank
- 3.6 Liters Cooling Tank

Logistics

Container Loading Quantity

- 238 pcs / 20'GP
- 476 pcs / 40'HQ

Packing Dimensions

34 x 33 x 98 cm

Features

Key Features

Hot & Cold Water, Compressor Cooling, Normal Storage Cabinet, Refrigerator Option Available
