

Hot and Cold Water Dispenser

This water dispenser provides both hot and cold water options. It features separate taps for hot and cold water, a removable drip tray, and indicator lights for heating and cooling.

Overview

Versatile Water Dispensing Solution

This water dispenser is designed to provide convenient access to both hot and cold water in a single, compact unit. Featuring a user-friendly interface with color-coded taps, it allows for quick identification and dispensing of the desired water temperature. The unit is equipped with integrated indicator lights and a removable drip tray to ensure a clean and efficient operation in any professional or home environment.
