

Hot and Cold Water Dispenser

This water dispenser provides both hot and cold water options for convenient use. It features efficient cooling and heating systems and is designed to accommodate standard water bottles.

Overview

Versatile Water Dispensing Solutions

The 5T16 series water dispenser offers a flexible solution for both home and office environments, providing reliable access to hot and cold water. Engineered for efficiency and ease of maintenance, these units feature durable construction and intuitive indicator lights for temperature readiness. Whether you require standard cooling or high-performance compressor cooling, this series accommodates various needs with multiple model configurations.

Technical Specifications

Model Comparison

Model	Water Temp Options	Cooling Method
LB-TWB5T16	Hot and Normal	Semi-conductor
LB-TWB0.5-5T16	Hot and Cold	Compressor
LB-TWB1.5-5T16	Hot and Cold	Compressor

Net Weight by Model | 3 KG (LB-TWB5T16), 5.6 KG (LB-TWB0.5-5T16), 15 KG (LB-TWB1.5-5T16)
