Product Overview

Suspension Anchor Hook

This hot-dip galvanized iron suspension anchor hook, commonly referred to as a pig tail hook, is engineered for reliable performance in electric power line fittings. It serves as a robust anchor point for suspension applications in overhead power distribution systems. The durable iron construction, combined with a hot-dip galvanized finish, provides essential corrosion resistance for long-term reliability in outdoor environments.

Technical Specifications

Engineered for robust performance and corrosion resistance in demanding outdoor environments.

Corrosion Protection

Hot-dip galvanized • Weather resistant

Installation Components

- Threaded shaft
- Nut included
- Washer included

Material & Finish

Iron with Hot-Dip Galvanized coating

Primary Application

Overhead power lines, Suspension, Anchoring, Distribution systems

Company Standards

Service Capabilities

- OEM Service Available
- Free Samples Available
- 1 Year Warranty

Certifications

CE, ISO 9001, UL
