

Hot Glue Labeling Machine for Paper Tubes

This fully automatic labeling machine applies labels to paper tubes and cans using hot glue. The modular design allows for easy maintenance and adjustments.

Product Overview

High-Efficiency Paper Tube Labeling

This hot glue labeling machine is engineered for the precise application of labels onto paper tubes and cans. It features an automated workflow with support for both automatic and manual tube feeding, ensuring versatile integration into existing production lines. Designed for high-volume environments, it prioritizes consistent precision and simplified maintenance through a modular architecture.

Technical Specifications

Performance Metrics

35 pcs/min

Max Efficiency

1 mm

Labeling Precision

2.1 kW

Rated Power

Machine Dimensions

Parameter	Value
Length	2020 mm
Width	1000 mm
Height	1530 mm
Weight	370 kg

Operating Parameters

Compatible Tube/Label Specs

- Tube diameter: \varnothing 30- \varnothing 160mm
- Tube wall thickness: 0.8-15mm
- Label height: 80-420mm
- Label weight: 100-157g

Utility Requirements

Air pressure: 0.4Mpa, No-wash required
