

Hot Melt Adhesive Applicator

This hot melt adhesive applicator is used for bonding materials together using hot melt adhesive sticks. It features an ergonomic design, power cord, and interchangeable nozzle variations.

Product Overview

Professional Hot Melt Adhesive Applicator

This hot melt adhesive applicator is designed for precision bonding and assembly tasks in professional environments. Featuring an ergonomic design for reduced operator fatigue, it supports various nozzle configurations to accommodate different adhesive application needs. This versatile tool is essential for efficiently bonding a wide range of materials using standard hot melt adhesive sticks.

Technical Specifications

Tool Type	Hot Melt Adhesive Applicator
Design Features	Ergonomic Design, Interchangeable Nozzles, Corded Power
Primary Use	Material bonding and assembly

Included Components

Package Contents

- Adhesive applicator gun
- Power cord
- Nozzle variations
