

Hot Melt Adhesive Sticks

Hot melt adhesive sticks are cylindrical and used in glue guns. They are made of a thermoplastic polymer blend that melts when heated, providing a strong and durable adhesive bond upon cooling.

Product Overview

Professional Hot Melt Adhesive

These professional-grade white hot melt adhesive sticks are designed for versatile bonding applications across a wide range of materials. Measuring 200mm in length, they are ideal for use with standard hot glue guns to bond paper, card, wood, cork, leather, fabrics, plastics, and ceramics. This general-purpose adhesive provides a reliable and durable bond, making it an essential tool for craft, repair, and assembly projects.
