

# Hot Pressed Diamond Saw Blade

This is a hot-pressed diamond blade engineered for efficient cutting performance. It features a durable construction and an optimized diamond matrix to ensure clean and swift cuts on a variety of materials.

## Product Overview

### High-Performance Cutting Solution

This hot-pressed diamond saw blade is engineered for professionals requiring fast, clean cuts across a variety of demanding materials. Its durable construction and optimized diamond matrix ensure consistent performance and longevity in heavy-duty applications. Designed for compatibility with standard electric tools, this blade delivers reliability and precision on the job site.

## Technical Specifications

Maximum R.P.M.	6650 R/MIN
Maximum Operating Speed	80 M/S
Manufacturing Reference Codes	MFG 95100, MFG 95002
