

Hotel Building Construction Project

This project involves the construction of a hotel building using steel structure. It encompasses design, fabrication, and on-site assembly.

Project Overview

Comprehensive Construction Services

This hotel building construction service encompasses a full spectrum of civil, public, industrial, and infrastructure development. We offer versatile contracting models, including total package solutions and Engineering, Procurement, and Construction (EPC) contracts. Our team is equipped to handle complex architectural projects, ensuring high-quality delivery from foundation to final decoration.

Qualifications & Expertise

Specialized Contracting

- Curtain Wall Design & Construction
- Municipal Utilities Contracting
- Fire Control Facilities Engineering
- Foundation Engineering (Grade B)

Primary Qualifications

Housing Construction Level 1, Architectural Decoration, Mechanical & Electrical Installation, Steel Structure Engineering, Building Intelligence Engineering

Project Reach

Global Presence

30

Countries & Regions

20

Domestic Provinces/Cities
