

Household Air Conditioning Unit

This air conditioning unit is designed for household use. It provides cooling and air circulation to maintain a comfortable indoor climate.

Overview

Efficient Household Climate Control

This household air conditioning unit is engineered for reliable, long-term performance in residential environments. Featuring a durable plastic body and a high-quality closed aluminum motor, the unit offers excellent protection against moisture and heat. With flexible speed configurations and an optimized water distribution system, it ensures uniform cooling and efficient operation.

Technical Specifications

Power Configurations

- Three-phase single speed
- Single-phase single speed
- Single-phase inverter (16 file)
- Single-phase transformer speed (16 files)

Motor Construction

Closed aluminum motor

Protection Features

Waterproof, Moisture-proof, Heat-resistant

Design & Build

Body Material

Plastic

Airflow Direction

Under way

Performance

Water Distribution

Open-water distribution device for smooth, uniform flow

Filtration

High-performance evaporation filter
