

Household Air Conditioning Unit

This air conditioning unit is designed for household use. It provides cooling and temperature regulation for maintaining a comfortable indoor environment.

Product Overview

Designed for Reliability and Comfort

This household air conditioning unit is engineered for durability and consistent performance. Featuring a robust metal body and a high-quality closed aluminum motor, it provides excellent protection against environmental factors like moisture. With its efficient evaporation system and user-friendly design, it offers reliable cooling for residential environments.

Technical Specifications

Power Phase	Single-phase
Speed Settings	3
Wind Mode	Side wind mode

Construction & Durability

Body Material	Metal
Motor Type	Closed aluminum motor
Protection Features	Waterproof, Moisture-proof, Heat-resistant

Operational Features

Water Distribution	Open-water distribution device for smooth, uniform flow
Filtration System	High-performance evaporation filter
Easy to Clean	Yes
