

Household Coffee Machine with Pulp Container

This coffee machine is designed for household use and features a stainless steel body. It efficiently extracts coffee, separating the pulp for easy disposal.

Product Overview

Efficient Household Coffee Extraction

This household coffee machine is designed for seamless daily use, featuring a robust stainless steel body for durability and a dedicated pulp container for clean, efficient operation. It includes a convenient feeding tube and an intuitive on/off switch, making it simple to operate. Safety is prioritized with an integrated locking arm, ensuring the unit remains secure during the extraction process.
