Overview

Smart Household Humidity Control

This high-efficiency household dehumidifier is designed to maintain a dry and healthy living environment by effectively capturing excess moisture. It features independent dehumidification technology that prevents bacteria breeding while ensuring indoor temperatures remain comfortable, even blowing warm air during low-temperature operation. With its lightweight design and integrated wheels, the unit is easily portable to address humidity needs in any room of the house.

Key Performance Metrics

Key Features

8 L

Max Tank Capacity

2.5 L

Min Tank Capacity

Water Management

The unit features a large-volume water tank (up to 8L) with a clear water level window and automatic shut-off safety sensor.

Water Tank System

- Large-volume water tank options
- Visualized water level indicator
- Automatic shut-off when full to prevent overflow
- Removable design for easy emptying

Operation & Comfort

Advanced dehumidification technology ensures a dry environment without lowering room temperature, providing warm air in cold conditions.

Operational Benefits

- Independent dehumidification technology
- Maintains indoor temperature during operation
- Warm air exhaust in low temperatures
- Anti-bacterial moisture capture

Design & Mobility

Design Features

Lightweight, Portable Wheels, Compact Design, Sleek Aesthetics, User-friendly Control Panel

Safety & Protection

Safety Features

Overflow Prevention • Auto-Stop Sensor • Bacteria Prevention

Full Tank Protection

Yes
