

Household Dishwasher with Disinfection

This compact appliance washes and disinfects dishes in a two-tier system. It features a stainless steel finish and a digital control panel for selecting cleaning and disinfection cycles.

Product Overview

Advanced Household Dishwasher & Disinfection System

This compact dishwasher and disinfection apparatus is engineered for efficient household use, combining powerful cleaning with essential sanitization. Featuring a robust two-tier design, it separates washing and disinfection processes to ensure optimal hygiene. Built with a durable stainless steel finish, it is designed for both longevity and easy maintenance in small to medium-sized kitchen environments.
