Product Overview

Dual-Drawer Disinfection Cabinet

This household disinfection cabinet features a versatile three-door design, utilizing advanced sterilization methods to ensure kitchenware hygiene. It combines UV and ozone sterilization with medium-temperature drying in the upper and middle layers, while the lower layer employs high-temperature far-infrared sterilization reaching 125°C. With an intuitive digital display and touch controls, this stainless steel unit provides precise temperature management and reliable safety features.

Technical Specifications

Sterilization Technologies	UV, Ozone, Far Infrared, Medium Temperature Drying, High Temperature Sterilization
Maximum Temperature	125 °C
Cavity Material	Stainless steel
Control Interface	Digital display with touch control

Features & Safety

Safety Mechanisms

- Safety door control
- Open-door auto-stop function
- NTC temperature control accuracy

Design Highlights

Three-door design • Dual-drawer configuration • Black glass frame
